FFWD MAGAZINE TEST

NEW F6R BEST IN WEIGHT AND PRICE!

Canadian Cycling Magazine did a comparison test between aero wheels in their new February/March issue. The five deep carbon wheel sets from different brands are compared on weight, performance and price. The F6R is rated best in weight and price!!!

In the test Canadian Cycling Magazine refers to the very positive features of our new F6R tubular with the following quote:

“At just 1,350 g, the F6 wheels are

incredibly lightweight,

but offer a stiff ride and feel quick on flat roads.

The best part, though, might just be the price.

At \$1,700, these were the

lowest-priced option in our test,

despite being the lightest of the group.”
